

The Tygerberg Nature Reserve

We arrived at the school, very excited for our next outing, and immediately jumped into the two school buses. Shortly afterwards, we were at Tygerberg Nature Reserve.

We first played the name game and then moved on to the next activity, the Amazing Race. We played a memory game, then had to knock down blocks with a slingshot – this took a while... we solved puzzles and had to find our way to the end.

We stopped at the top of the hill to enjoy something to eat. By that time, the sun was setting and we enjoyed a beautiful sunset whilst we were eating. After a while, a boy spotted fireflies, which was a first for some of us. We then went on a night hike when we walked around the reserve and even spotted a baby mole snake. We kept walking until it was time to go home.

It was very interesting to learn about the nature reserve and I'm sure everyone enjoyed this outing.
